

A. Workflow General PCR Reagent

B. Workflow General PCR Instrument

Workflow Real Time PCR Research for Detection CoV-19

1. Preparation / Extraction

Nucleic Acid Purification Kits

Type of Nucleic Acid Purification:

- PCR Clean-Up & Gel Extraction Kit
- Plasmid DNA Purification System
- Genomic DNA Purification System
- RNA Purification System
- Virus Nucleic Acid Purification

BIO-HELIX
CORP., LTD.

Rapid Extract PCR Kit/Lysis Kit

DNA extraction is a vital component of modern molecular biology research. The ability to extract DNA from different organisms and tissue types is a key starting point for many downstream experimental procedures.

- PCRBIO Rapid Extract PCR Kit
- PCRBIO Rapid Extract Lysis Kit

PCRBIO SYSTEMS
simplifying research

2. PCR Detection

PCR Biosystems

The UK-based PCR experts, have expanded their range of specialist molecular biology kits. Our PCR experts are on hand to support researchers, developers and manufacturers.

PCRBIO SYSTEMS
simplifying research

More Info:

pcrbio.com/row/products/

Available applications for:

- Covid-19
- qPCR
- PCR
- NGS
- cDNA Synthesis

Extraction Kit

Type of Extraction Kit.

- Bacterial gDNA
- FFPE gDNA
- Lysis Beads
- Total RNA
- Virus Total RNA
- Virus Total RNA Plus
- Whole Blood

RNA, DNA, and Protein Purification Kits

MACHERY-NAGEL provides a large range of high quality products for RNA, DNA, and protein purification. Our products are usually referring to a specific target molecule or application. Available for research area, such as:

- Single cell analysis
- Food safety
- Microbiology
- Environmental testing
- Plant Research
- Forensic
- Animal Health
- Cancer Research
- Liquid Biopsy Research

MACHERY-NAGEL
